Analyses and reports

The ABW drafts analyses and materials on national security threats. By collecting data and producing reports and assessments we support the highest authorities in Poland in their decision-making process.

Our analyses cover intelligence, terrorist, cyber, economic and political threats. We not only describe the current situation, but also develop scenarios for how events might unfold.

Why is this important?

Reliable information is the cornerstone of effective national security management. It enables the authorities to respond swiftly to emerging threats and take pre-emptive action.
